Houston, TX 75202

Dear Mr. Miller,

As a resident of Baytown, I wanted to write to you and express my deep concerns about the San Jacinto Waste Pits and the process for addressing the current temporary cap. I truly feel that the best solution would be to institute a permanent cap that would take less time to construct and would guarantee that less toxic waste is stirred up.

By using a longer process we risk leaving even more families in danger than there already are. Also, what happens if during the long process of remediation a hurricane or flood occurs? We cannot afford to take that risk. The time for a permanent cap is now.

Sincerely,

(b) (6)
